

BUSINESS AND RECONSTRUCTION

*A Narrative History of a Significant Period for
Commerce and Industry, Written by Its Leaders*

PRIMARILY an index to The Nation's Business, yet its headings and sub-headings will give the reader of discernment a composite picture of the swift moving drama of the stirring year of 1919, a year in which business emerged into a new order of things. Landmarks of thirty years were swept aside, many of them never to be set up again. What of novel practices and new relationships is for 1920 to tell.

Each month during these days The Nation's Business, on the scene of action, clearly and faithfully reported in its pages these events and their momentous problems. The record is authoritative. It stands written in most part by the very men who were themselves the guiding powers of the events they chronicled. For the convenience of our readers these articles have been indexed in the pages following.
